About

I am an experienced frontend developer with over 3 years of professional experience. Using modern JavaScript tools and frameworks (React, TypeScript, Tailwind CSS), I design and build user experiences that are aesthetically pleasing, fast, and efficient. I possess excellent problem-solving skills and a UX/UI mindset, which I have applied in both solo and team projects.

Projects

Work Experience

Freelancer

2024 —

Fullstack developer

Budapest

Designing and developing custom web solutions using modern technologies.

Ramszesz Bútor Ltd.

2021-2023

Frontend developer

Budapest

Developing an online store on the OpenCart platform, including functional and technical solutions, as well as user-friendly UX/UI design and the creation of a modern user interface. The project also involved creating the complete visual identity, logo design, and marketing materials, all integrated with custom programming solutions.
